DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 21 and 22, there is no antecedent basis for "said fasteners".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Hight, Jr. et al #6,893,025. Hight, Jr. et al disclose a sealing assembly comprised of fasteners 10, each fastener having a diamond shaped engagement head 14, base portion 12, the base portion having spiral/coiled sections 12a-12c, and free end 12d, which is angled downward, elongated sealing member 18, having a woven fiberglass heat sealing tubular layer 18a, and a woven resilient

metal wire mesh tubular supporting frame/core 18b, which is received within 18a, and fasteners, as best seen in Figures 2, 5, 4, 7, 8, that penetrate into the hollow interior of the sealing member 18.

Claims 14-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Weil #5,066,028. Weil discloses a sealing assembly 20 comprised of elongated sealing member 28, which is made of woven fiberglass, and 30, a knitted metal wire tube having tensile strength (300,000 psi) as strong as steel, a tubular fastening means/fastening holder assembly 21, 22 (woven fiberglass), 24 (retaining element), which is made of a metal woven/knitted wire tube having tensile strength (300,000 psi) as strong as steel, and 36 (woven fiberglass), and bendable retaining element 34.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bono, Jr. et al #6,533,289; Nunnally #3,578,764, Moyer #5,205,075, #5,341,601, Moyer et al #4,822,060, Weil #4,986,033, #5,107,623, and Lusen et al #5,289,658 are cited to teach sealing assemblies for ovens.
